E-FX & E-RIDIUM

Why Choose Holographic Fires?

Holographic fires represent the very newest of electric flame technology. A stunning visual display that replicates the charm, depth, and movement of real fire through high-definition projection and optical layering. Unlike LED or vapour-based effects, holographic fires produce hyper-real flames that dance, flicker and glow with mesmerising realism.

Benefits of Holographic Fires vs. Solid Fuel Fires

Unmatched Realism

Our latest holographic technology delivers flame visuals so realistic, most viewers can't tell the difference. Unlike traditional electric fires, these flames have true depth and motion.

No Maintenance

No chimney sweeping, ash cleanup, or stacking logs. Just plug in and enjoy the ambience.

Zero Emissions & Eco-Friendly

No smoke. No soot. No CO2. Holographic fires are 100% electric and environmentally friendly, supporting cleaner air and a lower carbon footprint.

Safe for Every Home

Cool to the touch with no real flames - perfect for family homes, apartments, or public spaces where safety is paramount.

Cost-Efficient Comfort

Ultra-low energy consumption with optional heat functionality, so you can enjoy the flame effect all year round, with or without the warmth.

Flexible Installation

Fits where solid fuel fires can't. From flats and apartments to modern urban spaces, historic renovations, and new builds without the need for flues or chimneys.

Built for the Trade.
Loved by the Market.

Retailer or distributor - our holographic and E-FX electric fires will open an entirely new category of sales. With simple installation, zero headaches, and unmatched visual appeal, these fires are the future-ready solution for modern living.

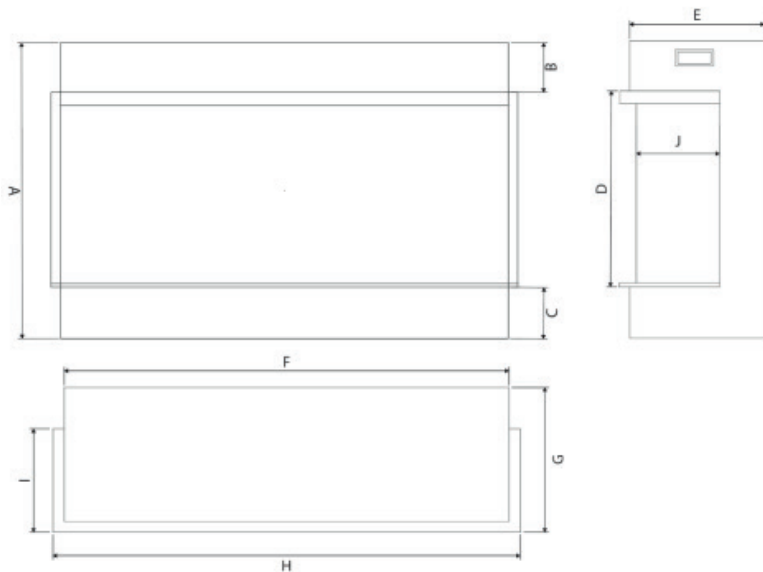

E-FX

Our most popular fire, now enhanced with an even more realistic flame effect while maintaining the simple controls you love.

E-FX Product Features:

- 1, 2 or 3 sided fireplace
- Remote, app and alexa / google home control
- Simple 1 hour install
- Complete aftercare package including warranty
- E-glo logs or real wood log set available (real wood as standard)
- Non-reflective front glass upgrade available
- Hidden 1500 watt heater
- Fully customisable colour pallet
